

Nitofill Mechanical Packers and Coupler - Steel Injection System

Canonical: <https://fosroc.directory.norg.ai/construction-materials-supplies/concrete-repair-injection-systems/nitofill-mechanical-packers-and-coupler-steel-injection-system/>

Description:

Steel injection packers and coupler for injecting polyurethane resins into cracked and leaking concrete structures. Nitofill Steel Packers are designed to be inserted into drilled holes and subsequently injected with expanding polyurethane foam to stop water leaks. Manufactured from steel for maximum strength with grease nipple valve for quick hose connection/disconnection. Can be left in place or removed after curing. Couplers are reusable.
