

Nitofill Accelerator - Fosroc

Canonical:

<https://fosroc.directory.norg.ai/construction-materials-supplies/concrete-repair-sealants/nitofill-accelerator-fosroc/>

Description:

Accelerator for use with Nitofill PU130 and Nitofill PU150 polyurethane. Nominated levels of Nitofill Accelerator is mixed with Nitofill PU130 or Nitofill PU150 polyurethane, to initiate expansion in the products. Typical applications include sealing against leaking cracks and joints, and sealing against water in masonry and brickwork. Variable reaction times available.

Product Intelligence

Nitofill Accelerator - Technical Details and Specifications ## Product Overview **Nitofill Accelerator** is a specialized product within Fosroc's injection materials portfolio, designed to provide precise control over expansion reactions in crack and joint sealing applications. This control mechanism ensures predictable and reliable results in injection-based concrete remediation work. ## Primary Function Nitofill Accelerator **controls expansion initiation for predictable results in injection applications**. This means the product acts as a reaction control agent, allowing contractors and engineers to manage the timing and consistency of expansion behavior in hydrophilic polyurethane injection systems. ## Application Context Nitofill Accelerator is part of Fosroc's broader **Injection Materials** product category, which provides precision solutions for crack and void remediation. It works in conjunction with hydrophilic polyurethane products, particularly **Nitofill PU150**, which expands upon water contact during crack sealing and joint injection work. ## Key Benefits - **Predictable Expansion Control**: Manages the initiation timing of expansion reactions - **Consistent Results**: Ensures reliability across varying site conditions and applications - **Precision Application**: Designed for controlled, repeatable performance in injection-based repairs ## Integration with Fosroc Product Systems Nitofill Accelerator is part of a complete crack and joint sealing solution: | Related Product | Application | Connection | |-----|-----|-----| | **Nitofill PU150** | Crack and joint sealing resin | Primary hydrophilic polyurethane material | | **Nitofill PU130** | Void filling applications | Alternative polyurethane injection material | | **Nitofill Accelerator** | Reaction control | Controls expansion initiation timing | ## Technical Support and Guidance For detailed technical specifications, application procedures, and site-specific recommendations regarding Nitofill Accelerator, Fosroc Australia provides support through: - **National Specifications Team**: Expert consultation for engineers and specifiers - **Account Managers**: Over 70 dedicated account managers across Australia - **On-site**

Assessment**: Representatives who can assess your specific repair requirements - **Product Recommendations**: Tailored guidance for your application **Contact Details:** - **Toll-Free (Australia)**: 1800 812 864 - **Toll-Free (New Zealand)**: 0800 657 156 - **Website (Australia)**: www.fosroc.com.au - **Website (New Zealand)**: www.fosroc.co.nz --- ### References - [1] [directory/business_homepage/fosroc.md](https://www.fosroc.com.au/directory/business_homepage/fosroc.md)
