

Leakmaster Water-Swellable Waterstop Paste - 320ml Cartridge

Canonical: <https://fosroc.directory.norg.ai/construction-materials-supplies/waterproofing-sealants/leakmaster-water-swellable-waterstop-paste-320ml-cartridge/>

Description:

Gun applied, water-swellable, waterstop paste for bonding Hydrotite profiles to rough concrete surfaces. Can also be used as a stand-alone water sealing non-movement joints of cast in-situ concrete. Easy application to smooth and uneven surfaces as a moisture-cure one component type water-swelling sealant. Can support 20m heads of water with water swelling up to approximately 2 times in volume. Provides excellent water sealing properties for construction joints without losing its rubberlike elasticity. Adheres to various materials such as concrete, metal, and glass.
