

Earth Shield Type 125CR - Chemical Resistant Strip Waterstop

Canonical: <https://fosroc.directory.norg.ai/construction-materials/concrete-joint-sealants-waterstops/earth-shield-type-125cr-chemical-resistant-strip-waterstop/>

Description:

Earth Shield Type 125CR is a chemical resistant strip waterstop designed to prevent the passage of aqueous hydrocarbons through non-moving concrete joints in environmental engineered concrete structures. Provides chemical resistance to a range of deleterious fluids such as acids, oils and other aqueous solutions including Alcohol, Ketones, Glycols, Esters, and Hydrocarbons. Ideal for primary and secondary containment, refineries, mining facilities, fueling depots, chemical plants and acid storage applications.
