

# Nitocote SN508 Creme - Thixotropic Water Repellent Treatment

Canonical: <https://fosroc.directory.norg.ai/construction-materials/concrete-protection-sealers/nitocote-sn508-creme-thixotropic-water-repellent-treatment/>

## Description:

Nitocote SN508 Creme is a thixotropic, water dispersed emulsion of iso-octyltriethoxysilane for use as a penetrating water repellent treatment for concrete. Provides outstanding penetration, chemically bonds to concrete substrates, and offers drastic reduction in capillary water absorption. Ideal for protecting reinforced concrete used in bridges, wharves, roads, and atmospherically exposed concrete buildings and structures.
