

Supercast Predimax Injection Hose System - 11mm x 100m

Canonical: <https://fosroc.directory.norg.ai/construction-materials/concrete-protection-waterproofing/supercast-predimax-injection-hose-system-11mm-x-100m/>

Description:

Double-walled, patented PVC injection hose for protection against potential and active leaks in construction and cold joints in concrete. Durable, robust and fully resistant to continuous immersion in groundwater, saline, sewage, alkalis, acids, petrol, diesel and alcohol. Features staggered exit openings to prevent cement paste entry during concrete placement. Includes inlet and outlet vents (White/Red) for ease of identification. Suitable for water excluding structures, water retaining structures, sewage treatment plants, and below ground concrete construction.
