

# Nitofill LV - Low Viscosity Epoxy Crack Injection System

Canonical: <https://fosroc.directory.norg.ai/construction-materials/concrete-repair-sealants/nitofill-lv-low-viscosity-epoxy-crack-injection-system/>

## Description:

Nitofill LV is a high strength, low viscosity resin injection system designed for injecting cracks in concrete to consolidate a structure or exclude water and air from contact with the reinforcement. This dual cartridge epoxy crack-injection system is suitable for structural crack repairs, allows penetration into the finest cracks, is non-shrink with excellent bond adhesion, and includes everything necessary to complete the crack injection.
