

Concure CR - Chlorinated Rubber Based Concrete Curing Compound

Canonical: <https://fosroc.directory.norg.ai/construction-materials/concrete-treatments-curing-compounds/concure-cr-chlorinated-rubber-based-concrete-curing-compound/>

Description:

Concure CR is a solvent-based chlorinated rubber curing compound ideal for industrial concrete floors. Used on freshly laid concrete floors and for curing vertical concrete areas immediately after form stripping. Enables efficient concrete hydration, complies with Australian Standards AS 3799, achieves 90% or greater water retention, increases concrete strength and dusting resistance, and eliminates the need for damp hessian, sand or polythene.
