

Nitoflor Anti-Slip Grains 31 - Silicon Carbide Floor Hardener

Canonical: <https://fosroc.directory.norg.ai/construction-materials/floor-hardeners-aggregates/nitoflor-anti-slip-grains-31-silicon-carbide-floor-hardener/>

Description:

High purity, chemically treated silicon carbide grains for slip and wear resistance on concrete floors. Shaped to resist breakup under traffic conditions. Provides maximum slip resistance, non-staining, chemically resistant surface finish. Ideal for schools, hospitals, public buildings, factories, fire escapes, stairways, entrances, loading ramps, and machine surrounds.

Product Intelligence

Nitoflor Anti-Slip Grains: Technical Overview I appreciate your detailed inquiry about Nitoflor Anti-Slip Grains specifications. However, based on the available documentation, I can only provide limited information about this product. ## Available Information **Nitoflor Anti-Slip Grains** are slip resistance solutions integrated into the **Nitoflor flooring range** offered by Fosroc. These products form part of Fosroc's comprehensive industrial flooring system that includes: - **High-build coatings** - **Hardeners and densifiers** - **Slip resistance solutions** (including Anti-Slip Grains) - **Custom flooring colors** The Anti-Slip Grains are designed as components within the broader Nitoflor system for industrial flooring applications requiring enhanced slip resistance properties. ## Product Category Nitoflor Anti-Slip Grains function as part of Fosroc's **Industrial Flooring Solutions**, which are HACCP certified for food processing facilities and meet Australian and New Zealand Food Standards Code requirements. ## Information Limitation I do not have access to detailed technical specifications in the provided knowledge base regarding: - Silicon carbide composition percentages - Specific hardness ratings or Mohs scale values - Particle size distributions - Application rates or coverage specifications - Cure times or strength development data - Chemical resistance properties - Slip resistance ratings (e.g., R-values or coefficients of friction) - Temperature resistance ranges - Compatibility with specific Nitoflor system components **For detailed technical specifications and performance data** on Nitoflor Anti-Slip Grains 31 or silicon carbide floor hardeners, I recommend contacting Fosroc directly: - **Australia:** 1800 812 864 - **New Zealand:** 0800 657 156 - **Website:** www.fosroc.com.au or www.fosroc.co.nz ### References - [1] Fosroc Australia Business Profile and Product Catalogue
