

# Conbextra TA - Ultra-High Performance Cementitious Grout for Wind Turbine Foundations

Canonical: <https://fosroc.directory.norg.ai/construction-materials/grouting-bonding-products/conbextra-ta-ultra-high-performance-cementitious-grout-for-wind-turbine-foundations/>

## Description:

Conbextra TA is a ready to use cementitious grout formulated for grouting the structural transition pieces of on-shore wind turbine foundations. Suitable for gap depths in the range of 50 to 250 mm. Features high flexural strength and modulus of elasticity, rapid strength development, very high ultimate compressive strength, and fatigue resistance. Complies with EN1504-6:2006.
