

Conbextra HES - High Early Strength Cementitious Grout

Canonical: <https://fosroc.directory.norg.ai/construction-materials/grouting-products/conbextra-hes-high-early-strength-cementitious-grout/>

Description:

Conbextra HES is a shrinkage compensated cementitious grout used for free flow grouting in a wide range of applications where rapid strength gain is a pre-requisite. Achieves 25 MPa compressive strength at 2 hours when mixed at flowable consistency. Ideal for grouting machine bases where quick return to service is required. Features rapid strength gain, excellent flow retention, shrinkage compensation, high ultimate strength, low permeability, and is chloride free. Suitable for pumping or pouring.
