

Conbextra HF - High Flow Cementitious Precision Grout

Canonical: <https://fosroc.directory.norg.ai/construction-materials/grouting-products/conbextra-hf-high-flow-cementitious-precision-grout/>

Description:

Conbextra HF is a dual shrinkage compensated high flow cementitious precision grout for gap thicknesses up to 125 mm. Features excellent flow retention properties, rapid strength gain, and high ultimate strength with low permeability. Suitable for precision grouting applications where high flow and long flow property retention is required. Hydrogen-free gaseous expansion, chloride free, and suitable for pumping or pouring.
