

Conbextra HS - Ultra High Strength Flowable Grout

Canonical: <https://fosroc.directory.norg.ai/construction-materials/grouting-products/conbextra-hs-ultra-high-strength-flowable-grout/>

Description:

Conbextra HS is a dual shrinkage compensated, high flow cementitious grout used for grouting applications where rapid strength gain and high ultimate strength is a pre-requisite. Features non-metallic dual expansion system, excellent initial flow and flow retention, rapid strength gain, high ultimate strength and low permeability. Compressive strength of 26 MPa @ 8 hours and 95 MPa @ 28 days when mixed at flowable consistency. Suitable for grouting machine bases where quick back to service is required and/or high ultimate compressive strength.
