

# Nitocote EP500 - Chemical and Abrasion Resistant Epoxy Liner System

Canonical: <https://fosroc.directory.norg.ai/construction-materials/protective-coatings-liners/nitocote-ep500-chemical-and-abrasion-resistant-epoxy-liner-system/>

## Description:

Spray-applied, trowel finished, high build, chemical and abrasion resistant epoxy liner system with 2mm to 5mm thickness. Provides enhanced formulation with increased resistance to acids and alkalis, specifically sulphuric acid found in waste water environments. Resistant to biological attack with superior chemical and physical bond to virtually all substrates. 100% solids content with no solvent. Ideal for chemical and abrasion resistant protection of concrete manholes, lining of outfalls, sewers and similar structures.
