

Nitocote EP410 - Highly Chemical Resistant Epoxy Coating System

Canonical: <https://fosroc.directory.norg.ai/construction-materials/protective-coatings/nitocote-ep410-highly-chemical-resistant-epoxy-coating-system/>

Description:

Nitocote EP410 is a highly chemical resistant, high build, solvent free, two pack epoxy coating for concrete and steel. Available in grey and white colours. Provides protection to concrete and steel structures in aggressive chemical exposure or immersion conditions such as process plants and sewage works. Features excellent adhesion, film build, and abrasion resistance. Easily applied by brush, roller or suitable airless spray equipment.
