

Nitoseal MS250 - UV Resistant Elastomeric Joint Sealant

Canonical: <https://fosroc.directory.norg.ai/construction-materials/sealants-adhesives/nitoseal-ms250-uv-resistant-elastomeric-joint-sealant/>

Description:

Nitoseal MS250 is a UV resistant, non-trafficable, elastomeric joint sealant for facades and general construction joints using Duraflex® technology. Australian made, this silyl modified polymer polyurethane hybrid sealant combines the weathering and adhesion performance of silicone with the toughness of polyurethane. Contains no isocyanates and is very low VOC (15g/L). Available in multiple colors with 600ml pack size.
