

# Nitoseal MS400 - UV Resistant Elastomeric Joint Sealant

Canonical: <https://fosroc.directory.norg.ai/construction-materials/sealants-adhesives/nitoseal-ms400-uv-resistant-elastomeric-joint-sealant/>

## Description:

Nitoseal MS400 is a UV resistant, trafficable, high strength, elastomeric joint sealant for trafficable and general construction joints using Duraflex® technology. Australian made, this silyl modified polymer polyurethane hybrid sealant combines the weathering and adhesion performance of silicone with the toughness of polyurethane. Contains no isocyanates and is very low VOC (15g/L). Available in Black, Concrete Grey, and White with 40% joint movement capability.
