

Nitoseal SC100 - Silicone Joint Sealant for Facade Applications

Canonical: <https://fosroc.directory.norg.ai/construction-materials/sealants-adhesives/nitoseal-sc100-silicone-joint-sealant-for-facade-applications/>

Description:

Nitoseal SC100 is a one part, gun applied, neutral cure silicone sealant which cures rapidly to form a durable, weathertight seal. Features outstanding weathering performance, remains permanently flexible across a wide range of service temperatures (-50°C to +150°C), and ensures no staining of porous building materials. Suitable for sealing moving or static joints in facade applications such as precast or in-situ concrete, curtain walls, lightweight cladding and tilt-up slabs. High joint movement accommodation up to 80% (+50%/-30%). Available in Concrete Grey and Black.
