

Nitoseal SC820 - Low Modulus Silicone Joint Sealant

Canonical: <https://fosroc.directory.norg.ai/construction-materials/sealants-adhesives/nitoseal-sc820-low-modulus-silicone-joint-sealant/>

Description:

Nitoseal SC820 is a low modulus, self-smoothing, one component silicone joint sealant with Roadseal® technology. Used for sealing sawn abutment joints between concrete and asphalt roads and pavements. Ready to use with no mixing required, offering excellent adhesion to clean dry concrete and sawn asphalt, excellent weathering resistance (UV and ozone resistant), and large joint movement accommodation ($\pm 100/-50\%$).
