

# Nitoproof 510 - Water-Based Epoxy Moisture Barrier Coating

Canonical: <https://fosroc.directory.norg.ai/construction-materials/waterproofing-coatings/nitoproof-510-water-based-epoxy-moisture-barrier-coating/>

## Description:

Nitoproof 510 is a grey, two-component, water-based epoxy coating that provides a moisture barrier to restrict passage of dampness through concrete and masonry substrates. When applied at 300 microns dry film thickness, it offers excellent protection for interior and below-ground applications. Features include solvent-free formulation, very low VOC emissions (<5 g/l), anti-microbial properties, and compatibility with damp substrates.
