

Nitoproof 810 - Water-Based Polyurethane Waterproofing Membrane

Canonical: <https://fosroc.directory.norg.ai/construction-materials/waterproofing-membranes/nitoproof-810-water-based-polyurethane-waterproofing-membrane/>

Description:

Nitoproof 810 is a highly flexible, water-based, single-component polyurethane waterproofing membrane designed for a wide range of waterproofing applications in the built environment. Suitable for internal and external wet areas, enabling direct fix of ceramic tiles. Features low VOC content (2 g/l), excellent elastic recovery (>355% elongation), and complies with AS/NZS 4654.1:2012. Can be flood tested after 48 hours at 23°C/50% RH.
