

# Nitoproof 210 - Bituminous Waterproofing Membrane

Canonical: <https://fosroc.directory.norg.ai/construction-materials/waterproofing-products/nitoproof-210-bituminous-waterproofing-membrane/>

## Description:

Nitoproof 210 is a high performance single component water based bituminous rubberised liquid applied waterproofing membrane which contains root inhibiting additives. Ideal for waterproofing applications such as retaining walls, planter boxes, building foundation walls and below ground tanking structures. Features excellent cold flexibility, elongation, and resistance to ponding water with low VOC content.
