

Vandex Cemelast - Flexible Cement-Based Waterproofing Render

Canonical: <https://fosroc.directory.norg.ai/construction-materials/waterproofing-products/vandex-cemelast-flexible-cement-based-waterproofing-render/>

Description:

Vandex Cemelast is a flexible, surface-applied, cement-based render for waterproofing of concrete and masonry structures. Mixed with Vandex BB75-Z, it accommodates dynamic crack movement up to 0.3mm and can be applied to either the pressure or non-pressure face of concrete. Tested to withstand a water head of 15 metres, it is based on sulphate-resisting cement suitable for pH-aggressive water tanks and works on masonry, brick, stone and concrete blocks. Non-toxic and suitable for use in potable water.
