

# Expoband F - Flexible Polyolefin Joint Bandage Membrane

Canonical: <https://fosroc.directory.norg.ai/construction-materials/waterproofing-sealants/expoband-f-flexible-polyolefin-joint-bandage-membrane/>

## Description:

Expoband F is a highly flexible, chemically resistant polyolefin (FPO) joint bandage membrane system. Available in 1mm and 2mm thicknesses with widths of 100mm, 150mm, 200mm, 250mm, and 300mm (special widths up to 500mm available on request). Supplied in 20m rolls. Forms a tough, flexible joint flashing that accommodates continuous and pronounced cyclic movement. Excellent resistance to UV and weathering. Complies with AS4020:2018 for potable water applications. Used to seal joints in car park decks, podiums, balconies, walkways, and water immersed applications such as tanks, sewers, reservoirs, pipelines, and swimming pools.
