

Hydrotite - Premium Grade Water Swellable Hydrophilic Waterstop

Canonical: <https://fosroc.directory.norg.ai/construction-materials/waterproofing-sealants/hydrotite-premium-grade-water-swellable-hydrophilic-waterstop/>

Description:

Hydrotite is a premium grade, water swellable, hydrophilic waterstop for use in cast in-situ concrete. It expands in a controlled fashion in the presence of moisture to create a pressure seal within construction joints in concrete structures. Features self-adhesive installation, co-extruded design for maximum seal, and is suitable for water retaining and water excluding structures.
