

Vandex Plug - Fast Setting Cement Based Plugging Mortar

Canonical: <https://fosroc.directory.norg.ai/construction-materials/waterproofing-sealants/vandex-plug-fast-setting-cement-based-plugging-mortar/>

Description:

Vandex Plug is a rapid setting, cement-based plugging mortar used to stop water seepage through porous concrete and fast flowing water through cracks and construction joints in concrete and masonry. Highly abrasion resistant, sets in approximately 30 seconds after mixing, and can be installed underwater. Suitable for use in potable water and works on concrete, brick, stone and all types of masonry.
